

For Immediate Release
From the Office of Command Personnel Affairs

Attention crew:

I have partnered with an external consulting firm (Stations United) to do a review of our communications. Before you say anything, yes, we have been monitoring and recording your comms traffic for the past 6 years. It was in your contract. If you have a problem with this you can approach the new Head of Personnel.

Anyways, there's some interesting data in this so I implore everyone to give it a once-over, or dare I say, a twice-over. I've attached their report below, unedited.

Nathan

~~Head of Personnel~~
Chief Engineer

Preamble

A study conducted by “Stations United”, a subsidiary of “NanoTrasen”

Information contained within this document is privileged and may not be shared outside the organization, station, command structure, or any other authority assumed to be under the confines of Nano-Trasen unless strictly authorised by an employee of the above mentioned entities central office.

General Statistics regarding the data used:

of Messages included: 52,286

of Network users included: 80

Topics covered in the initial report:

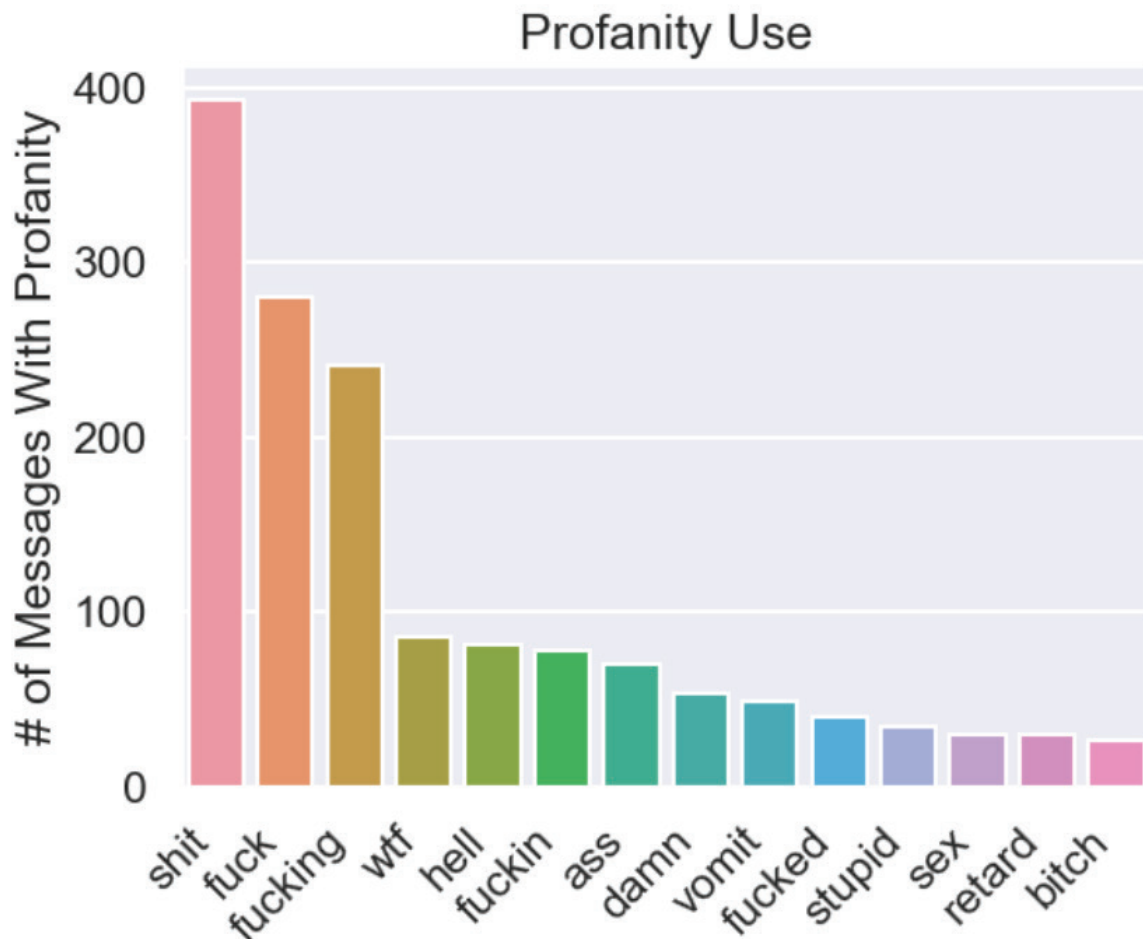

- Morale Trends
- Problematic* Trends
- Demonstration of emotions over time

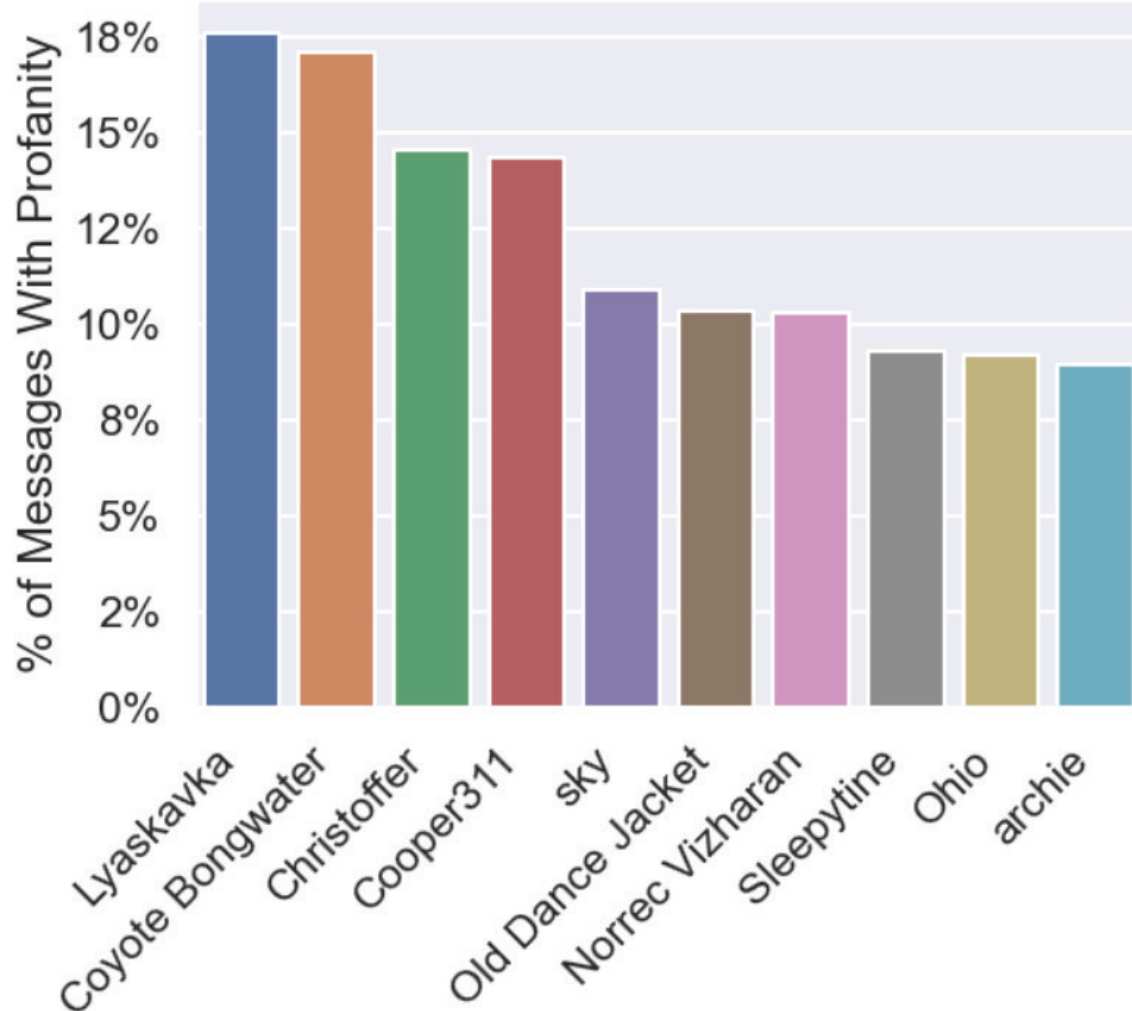

Profanity Use

It is no secret that among us are very foul-mouthed individuals, there mind unable to come up with more “creative” words other than what our society deems unacceptable. We analyzed this data and have been able to come up with some graphs for you.

Please note how sparingly “sex” is used.

Most Profane Users

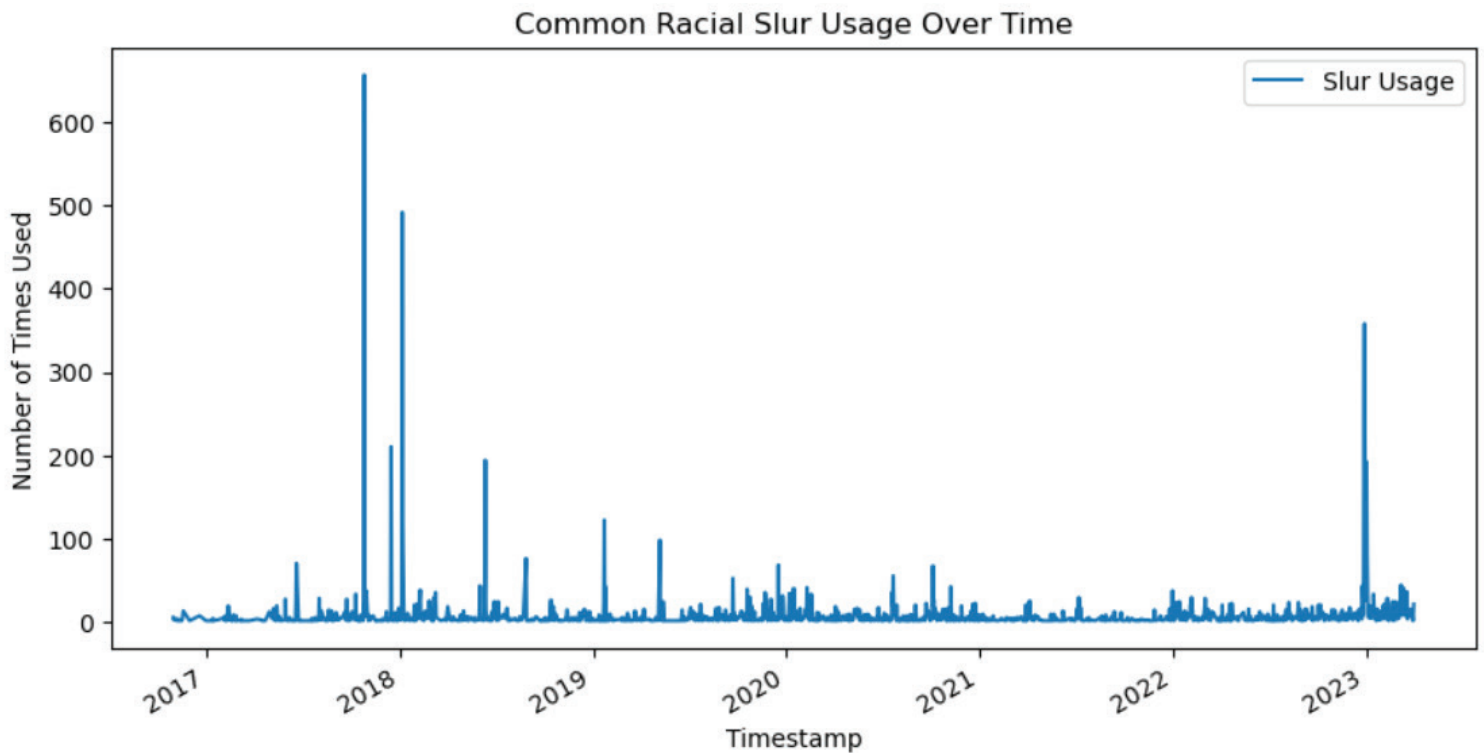

Note: Only users with at least 100 messages are shown

Slur Usage

One issue, that I'm sure your stations Head of Personnel will agree with, are issues that open the station up to lawsuits. Below we can see a graph of this stations usage of common racial or other minority-group related slurs.

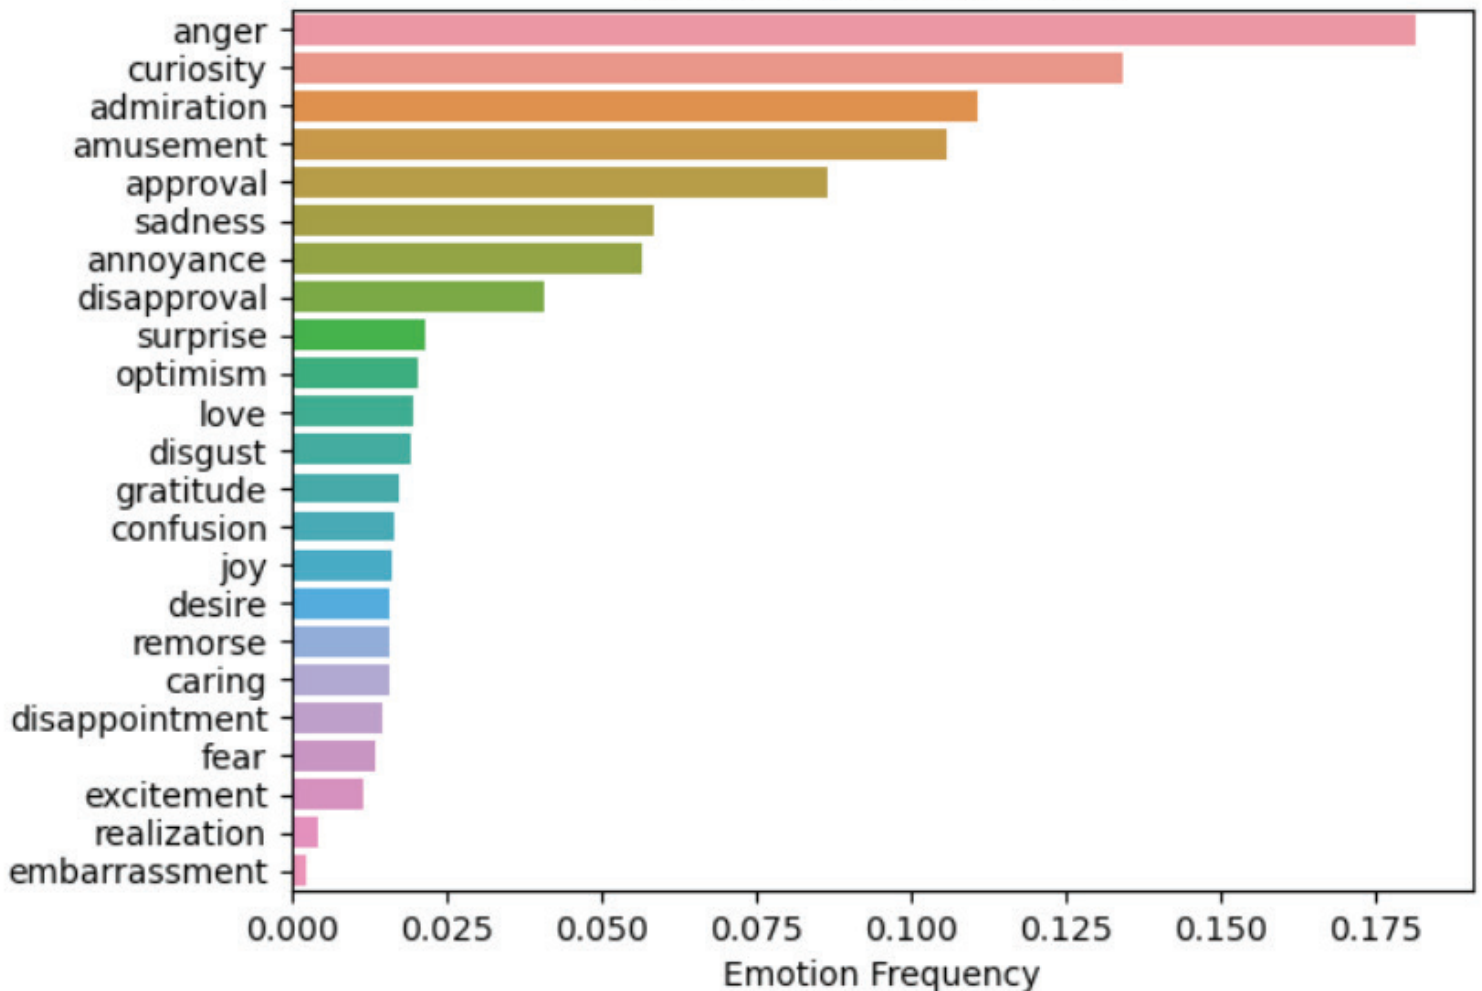

I must commend you all for bringing down your usage. This is often not a downward trend when we're brought in.

Emotional Spectrum

When it comes to being in deep space, aboard a vessel separated from civilization, being in the sights of many mal-intent organizations, emotional maturity is important.

Emotion Spectrum Profile

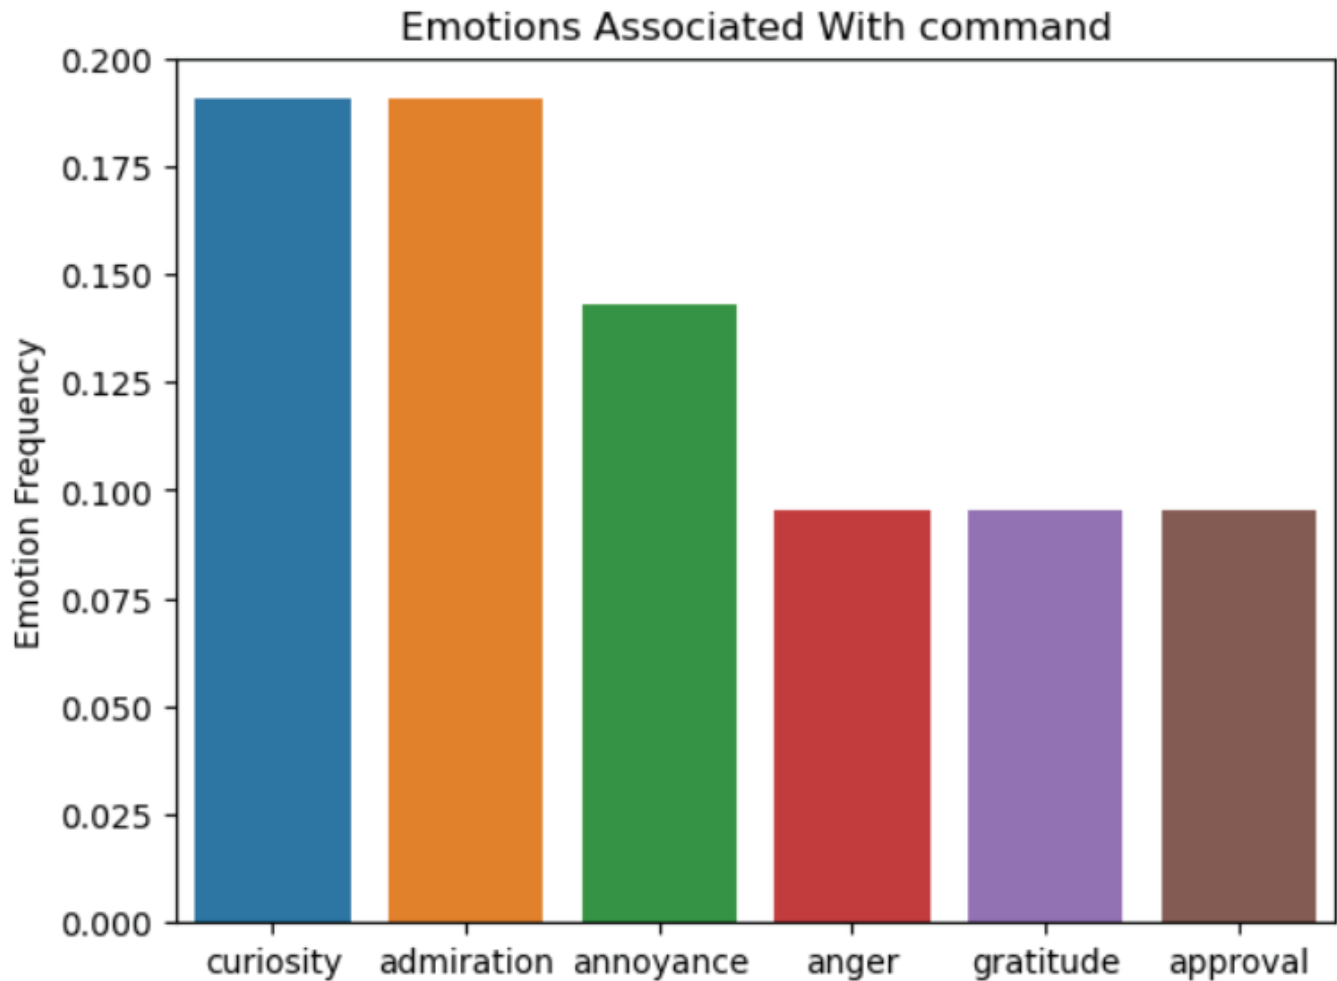

Anger is a powerful emotion, especially when there is nothing you can do about what's causing said anger. In our previous research, we have concluded that high levels of anger are often nothing to worry about, in fact, high levels of anger are signs of a well maintained crew, sometimes.

Loyalty

Part of our research is to determine the current attitude towards central command. If there were to ever be signs that a station or it's crew were developing a disdain for central command, they would immediately be seperated.

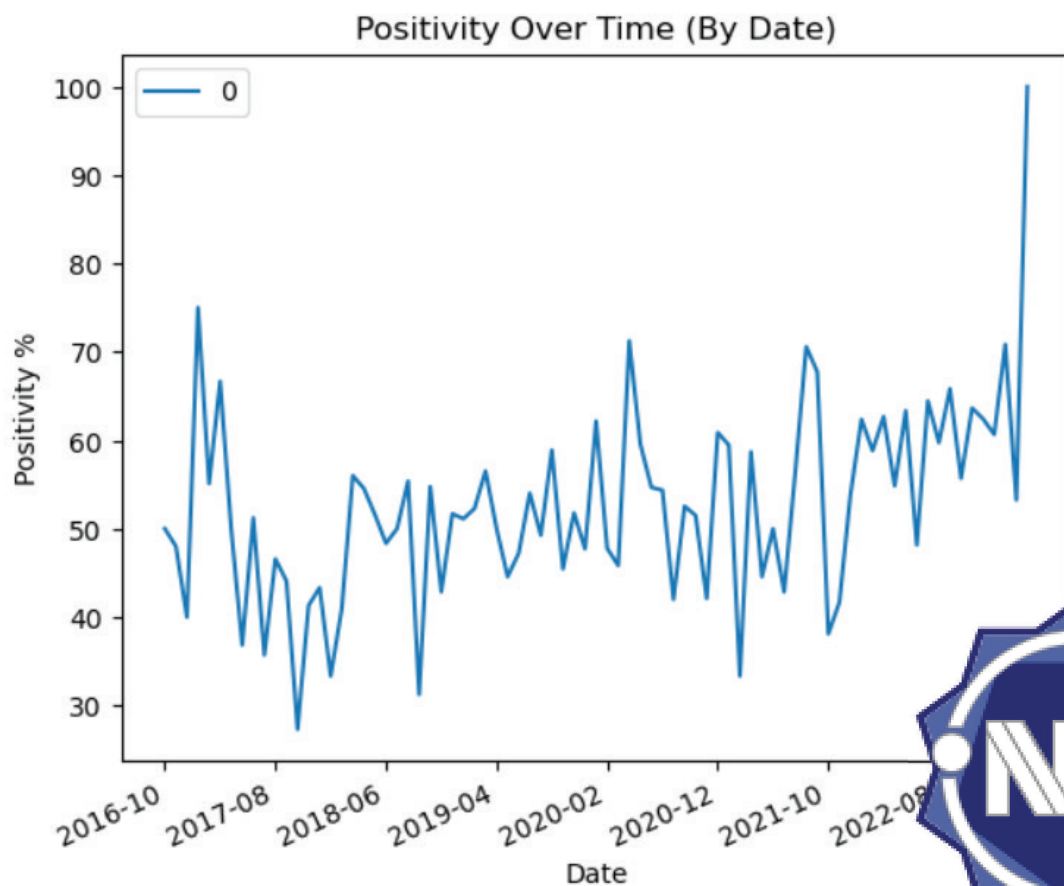

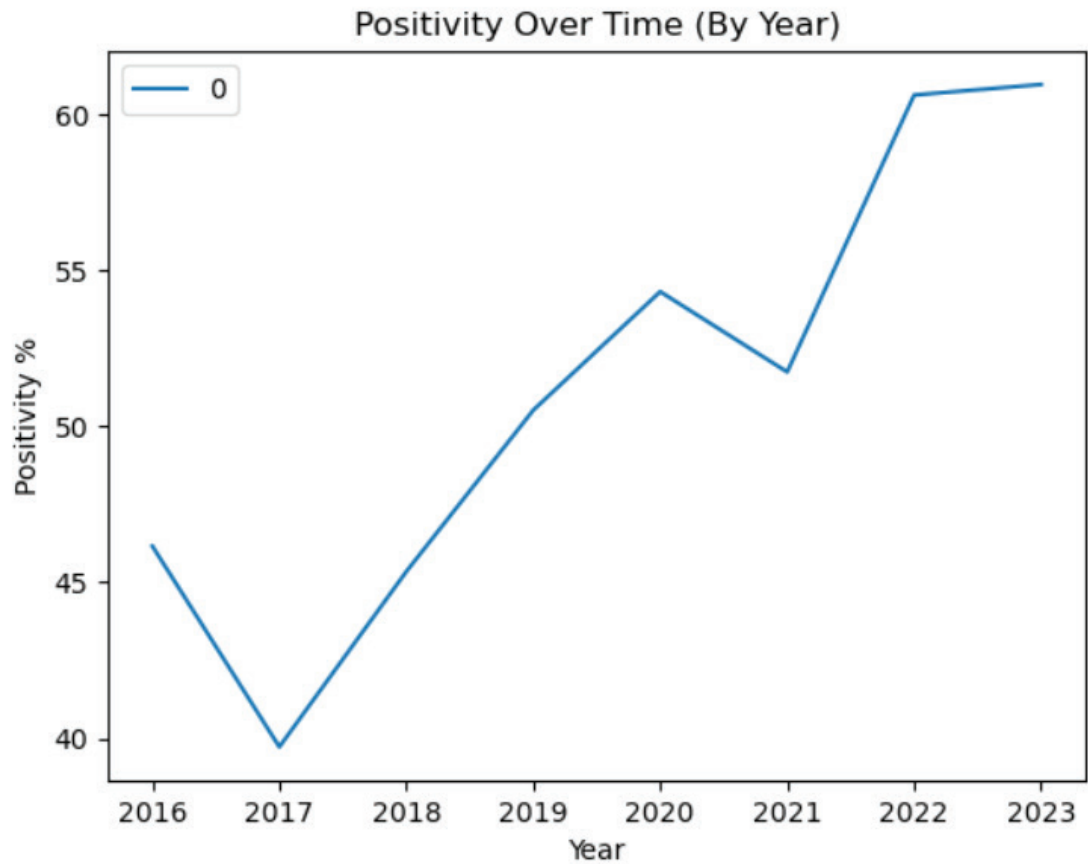

Luckily, anger is only the fourth most common emotion your crew associate with Central Command. If it were to be within the top three though, then we'd have an issue that would be swiftly dealt with.

Morale Trends

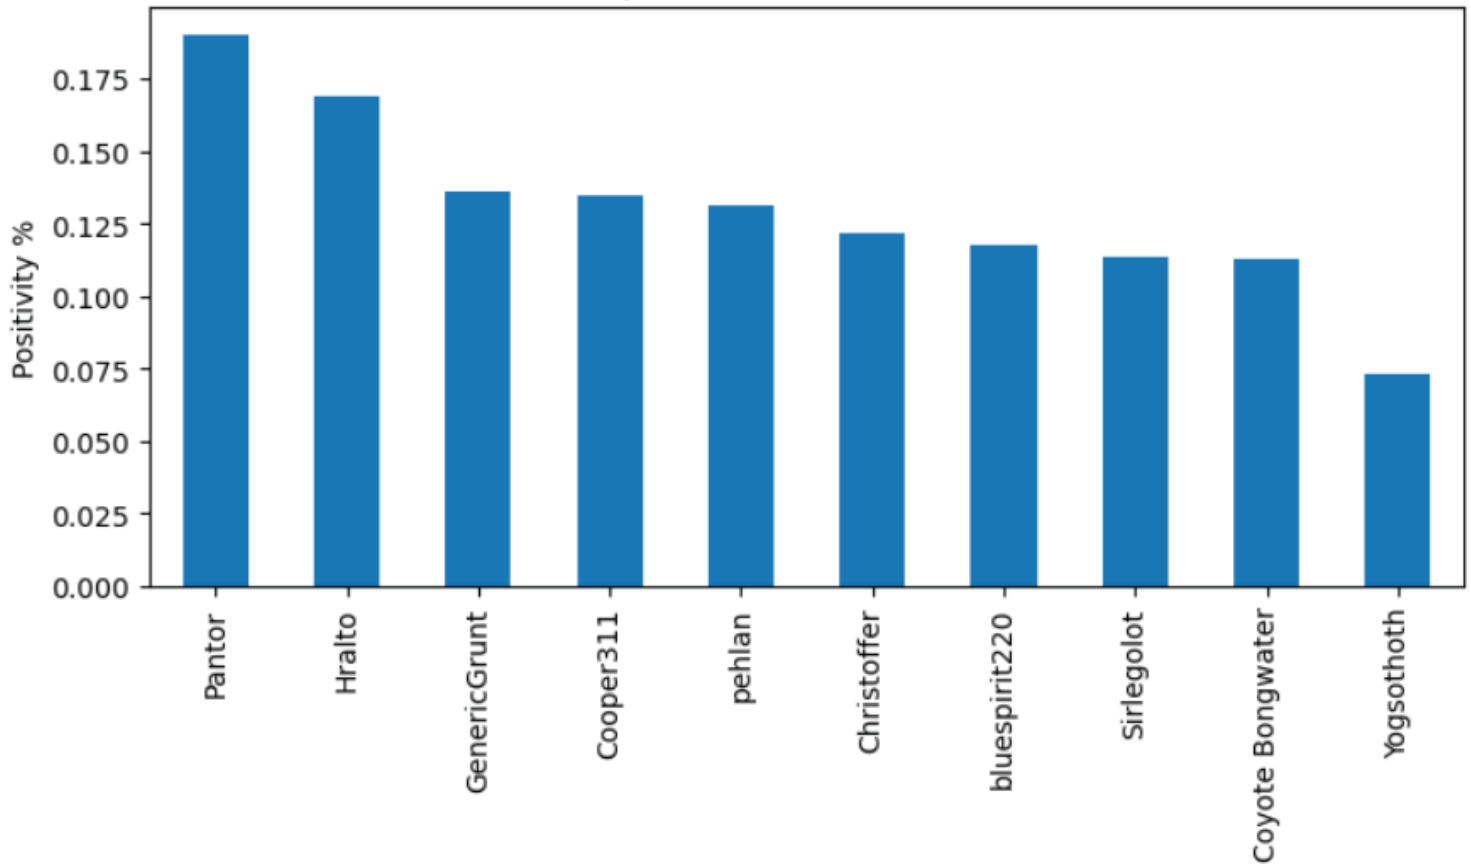

Below we present overall morale trends for the past 6 years.

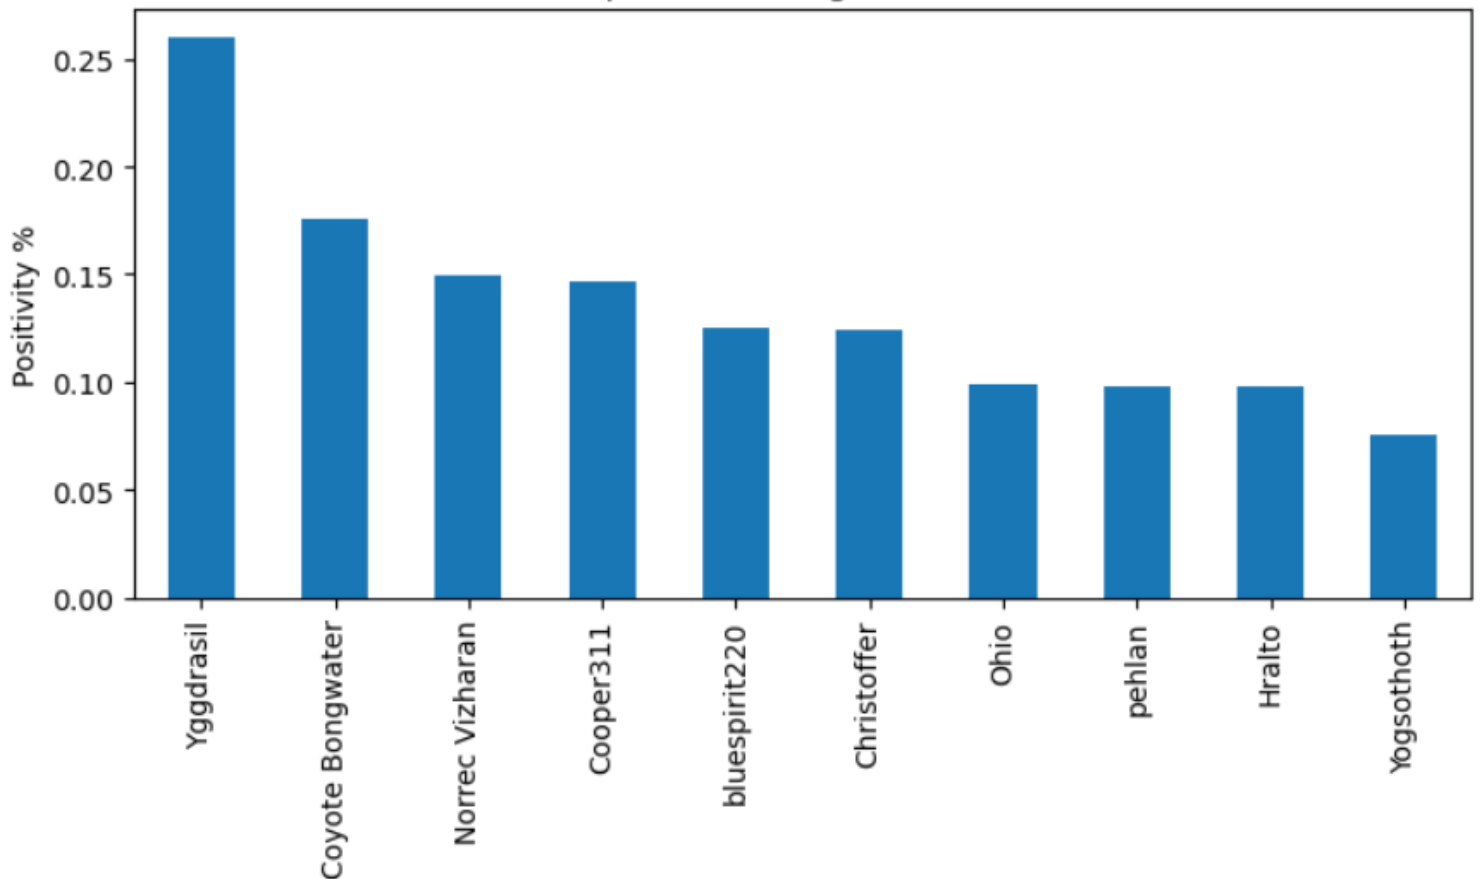

Individual Morale

If staff wish to take a more individual approach to morale, we have attached data regarding individuals with the highest and lowest morale.

Top 10 Most Positive Users

Top 10 Most Negative Users

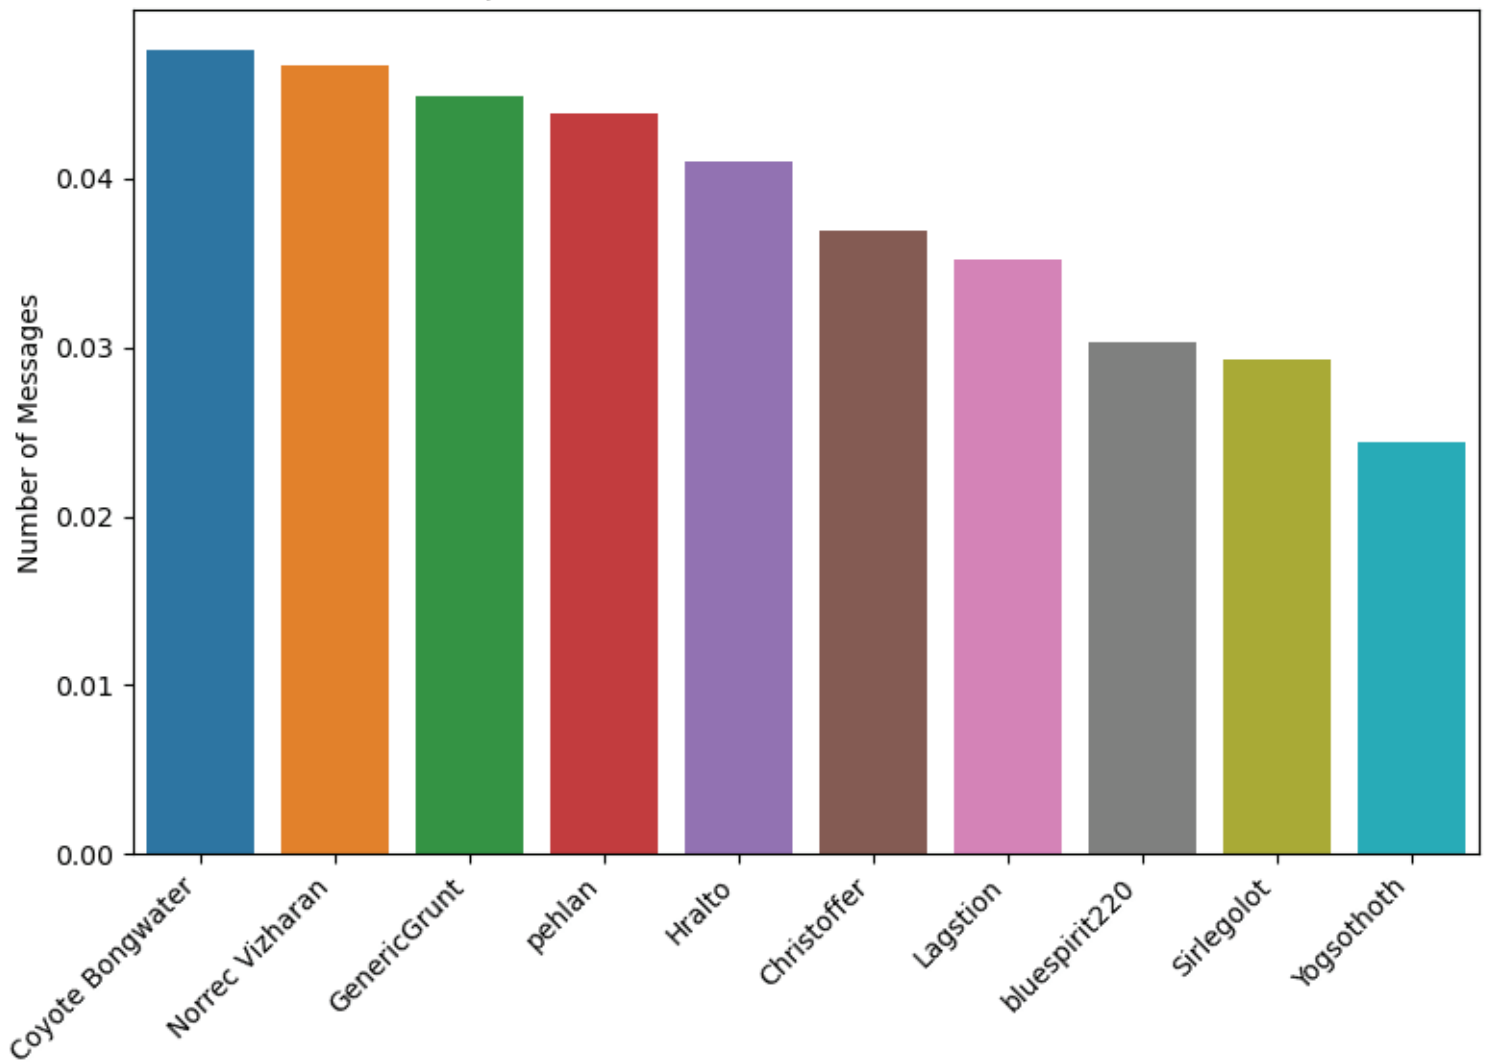

Emotional Spread

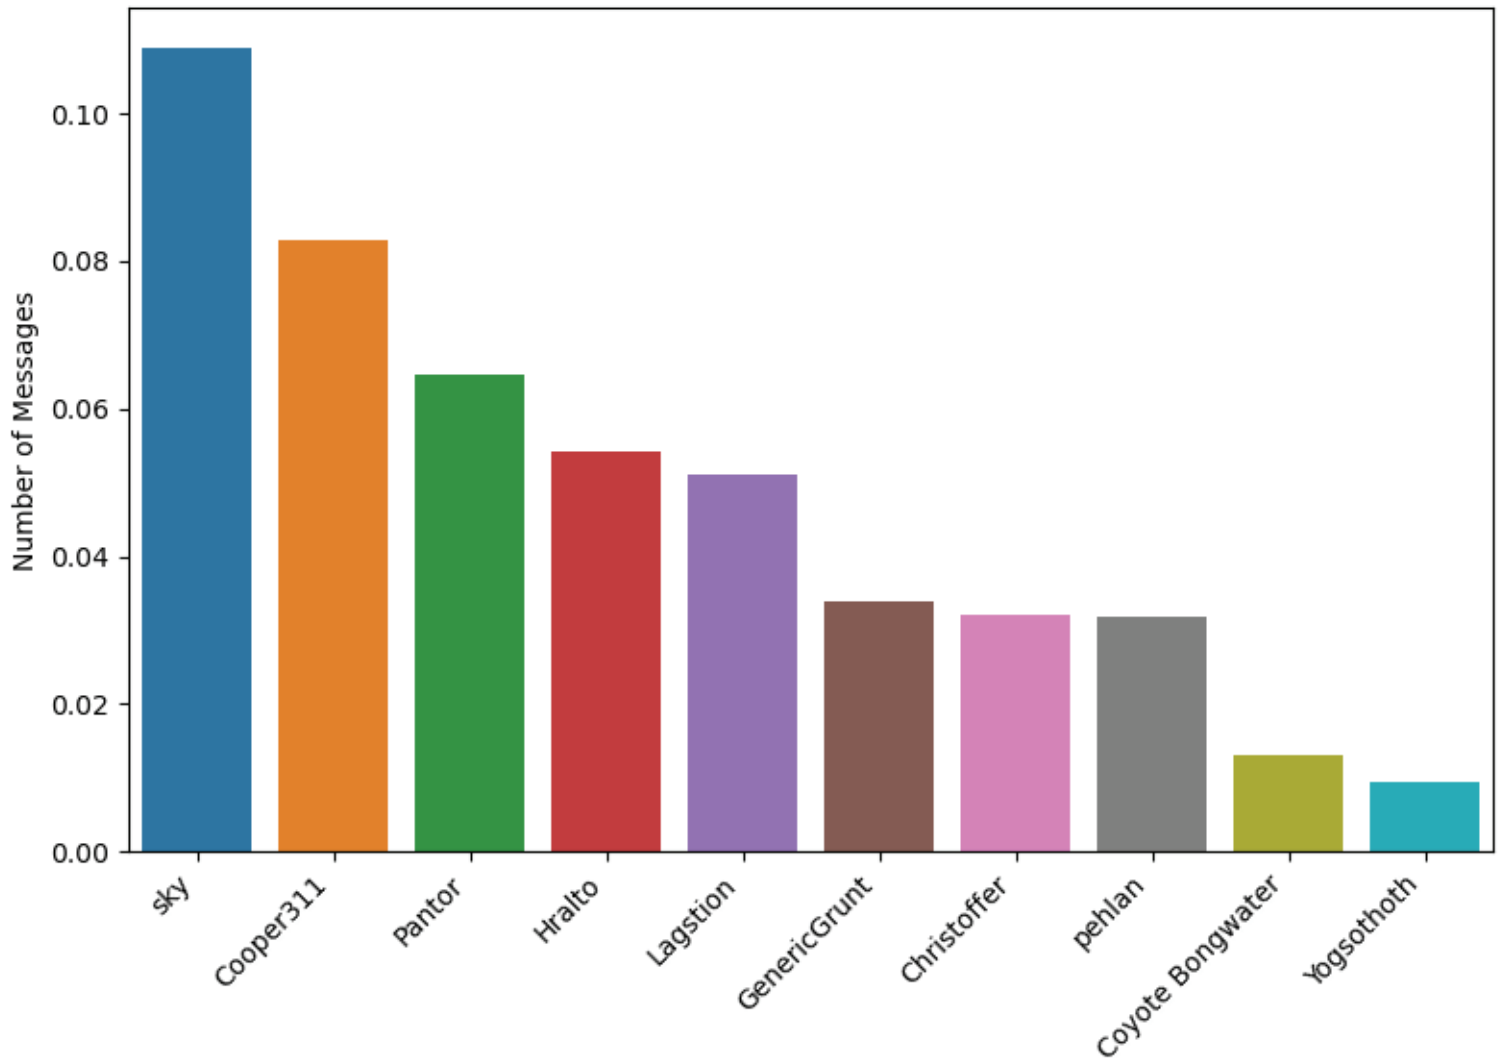

In the following section, we will showcase each emotion along with the top 10 users who display these emotions most often.

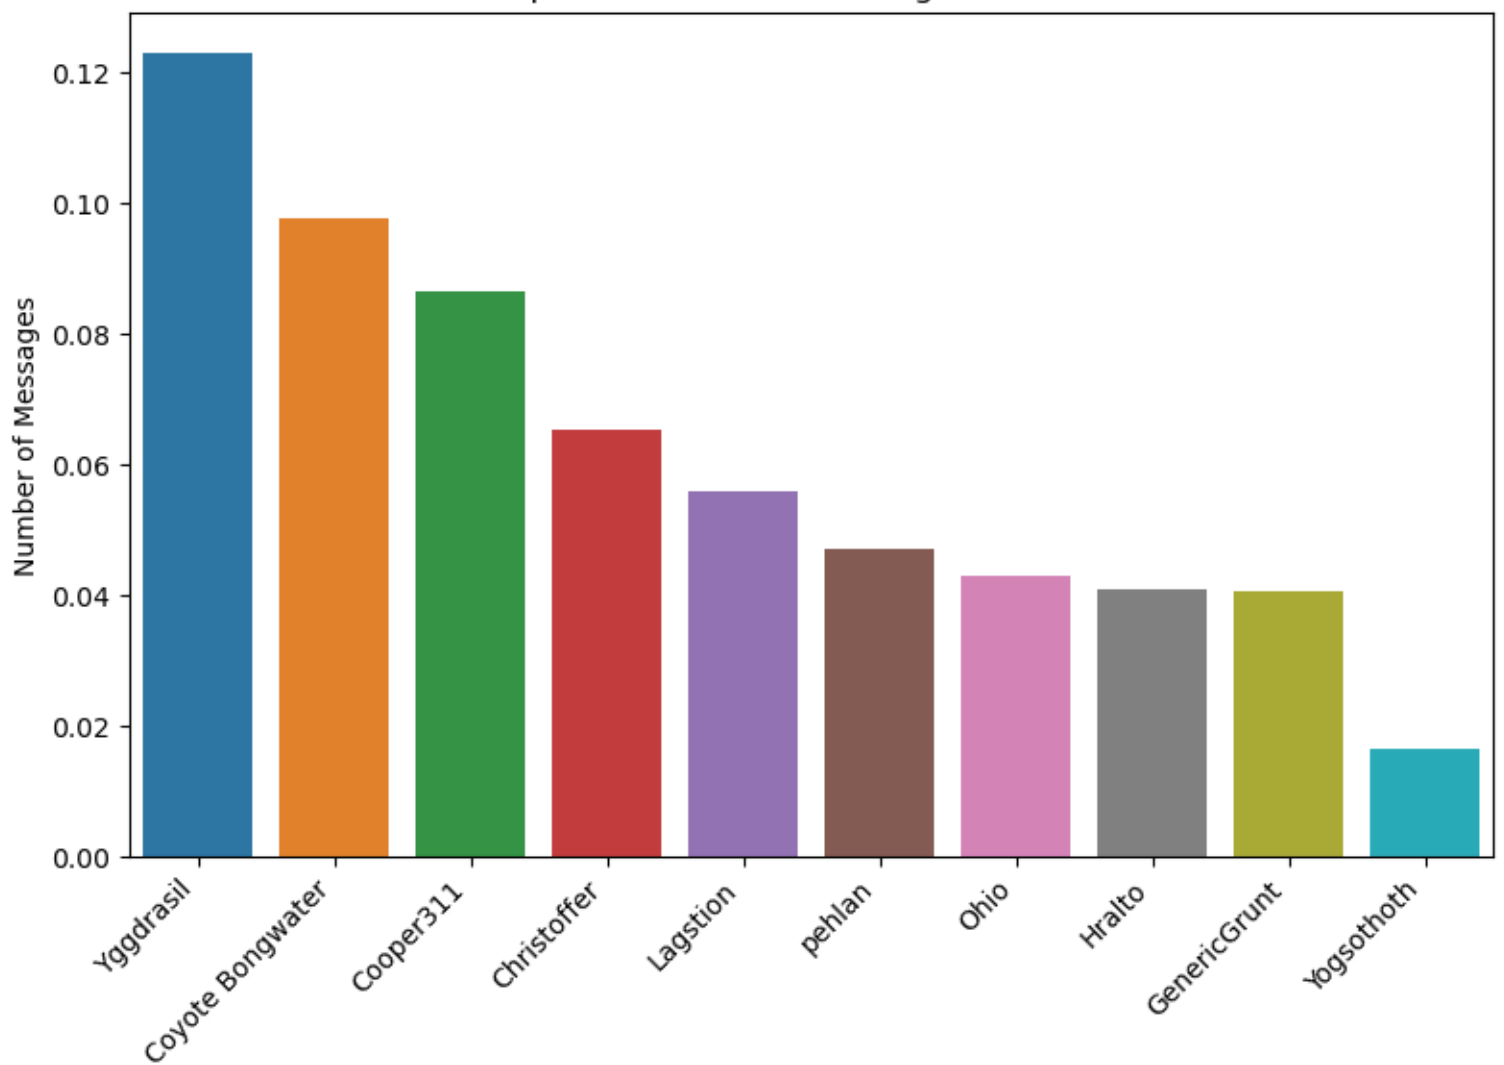

Top 10 Users Who Use 'Admiration' the Most
